https://www.eclipse.org/downloads/download.php?file=/oomph/epp/2021-06/R/eclipse-inst-jre-win64.exe

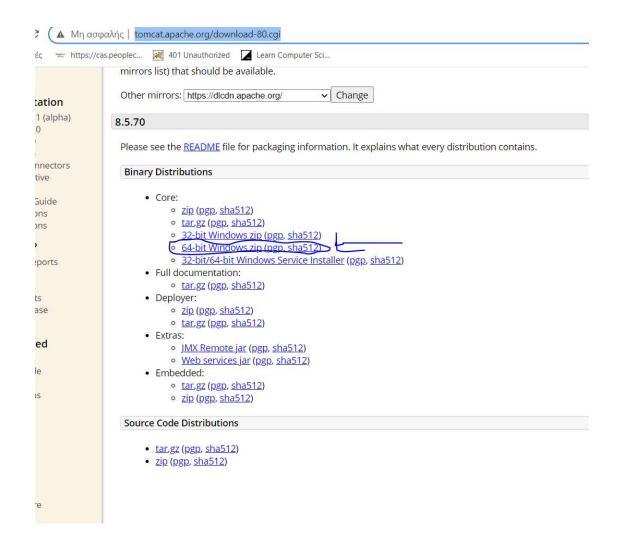

Eclipse IDE Enterprise Java and Web Development.

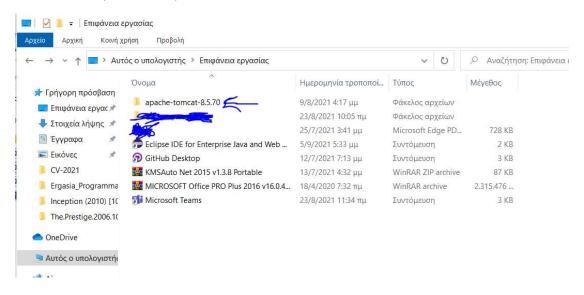

Install Tomcat

http://tomcat.apache.org/download-80.cgi

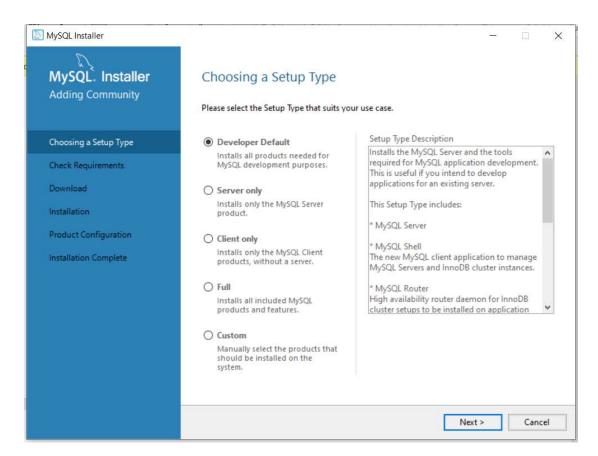

Extract files in your Desktop.

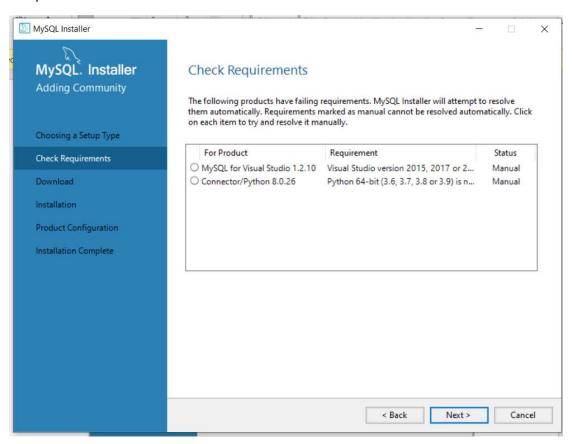

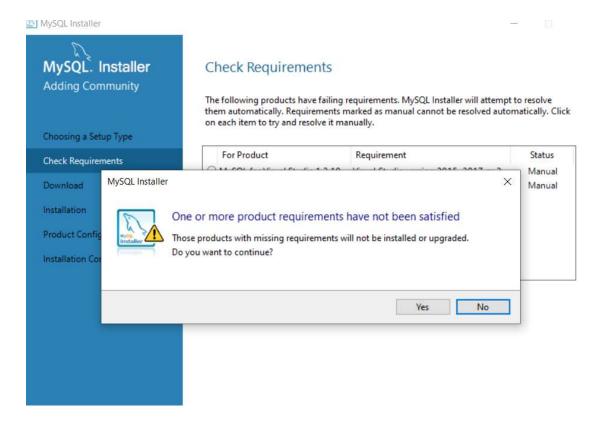

Download mySql:

https://dev.mysql.com/downloads/file/?id=506567

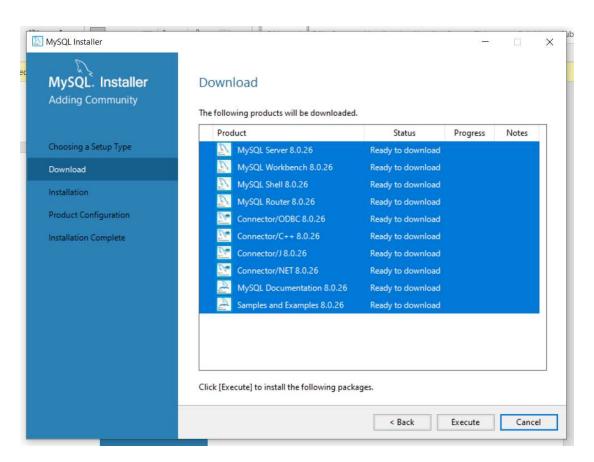

Just press Next

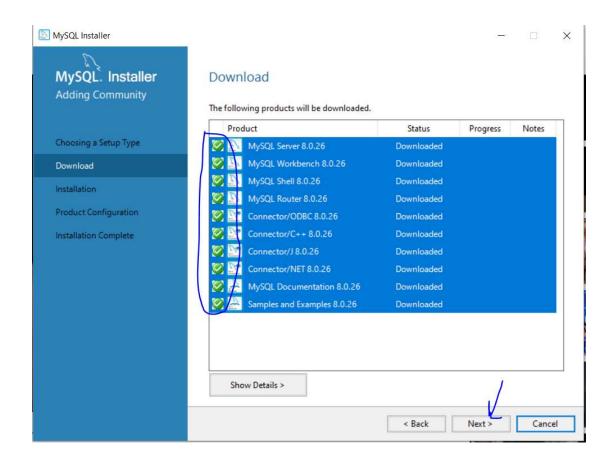

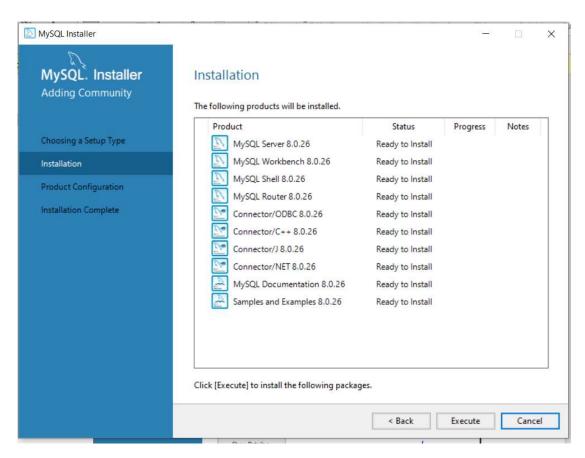

Press yes

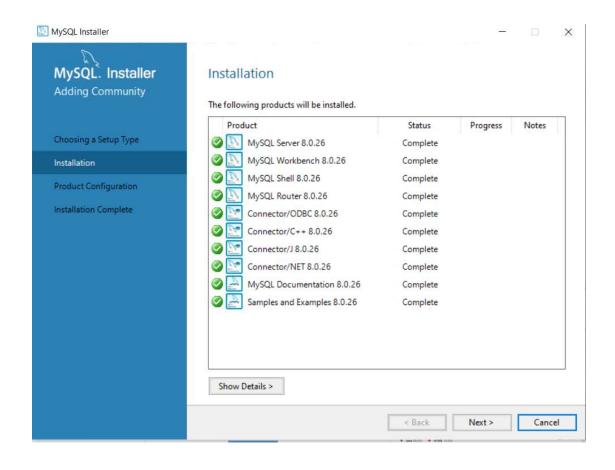

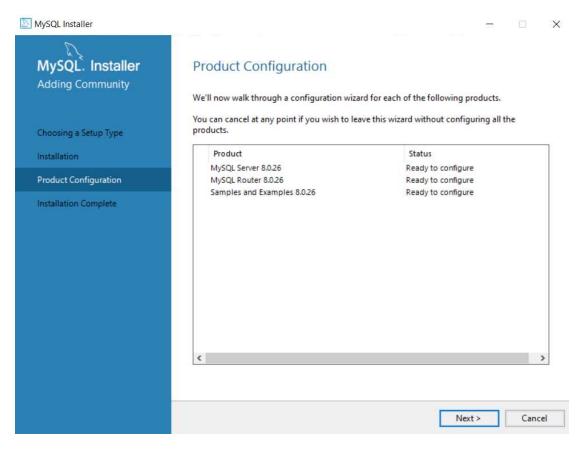

Execute.

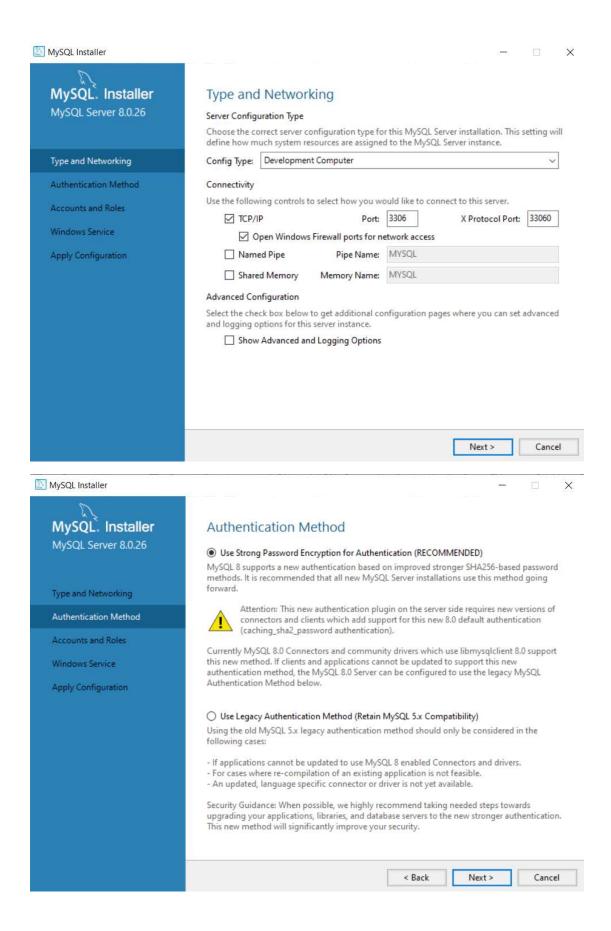

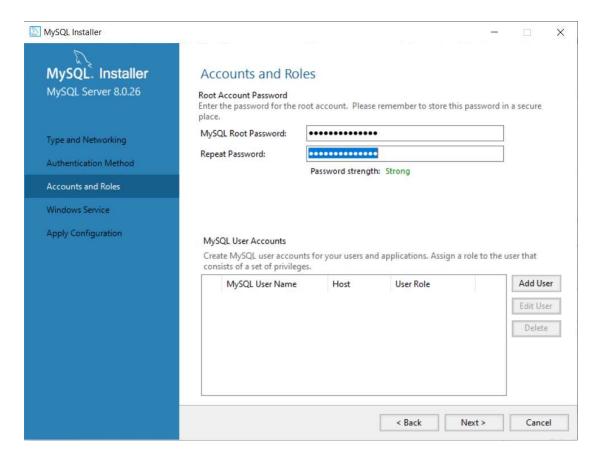

Execute.

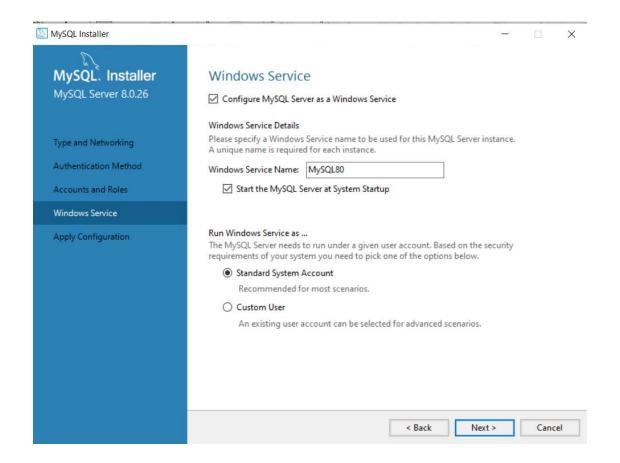

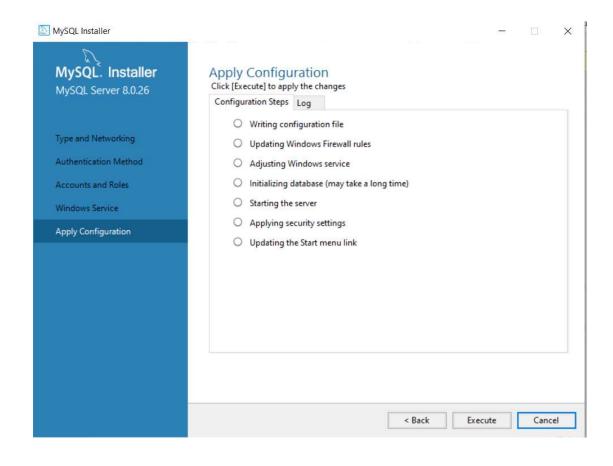

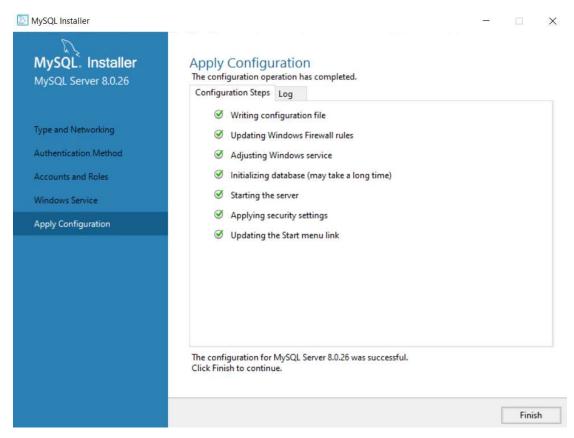

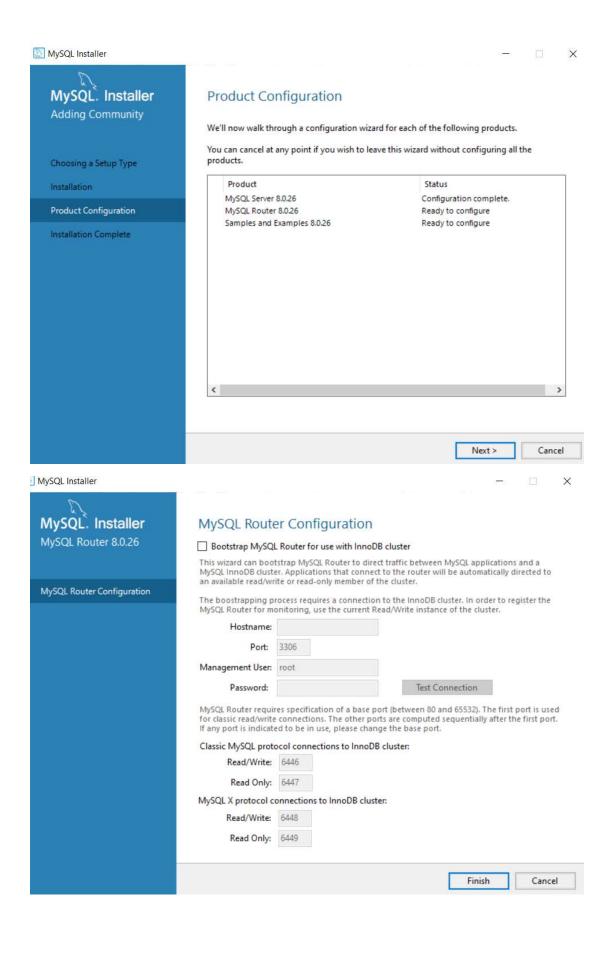

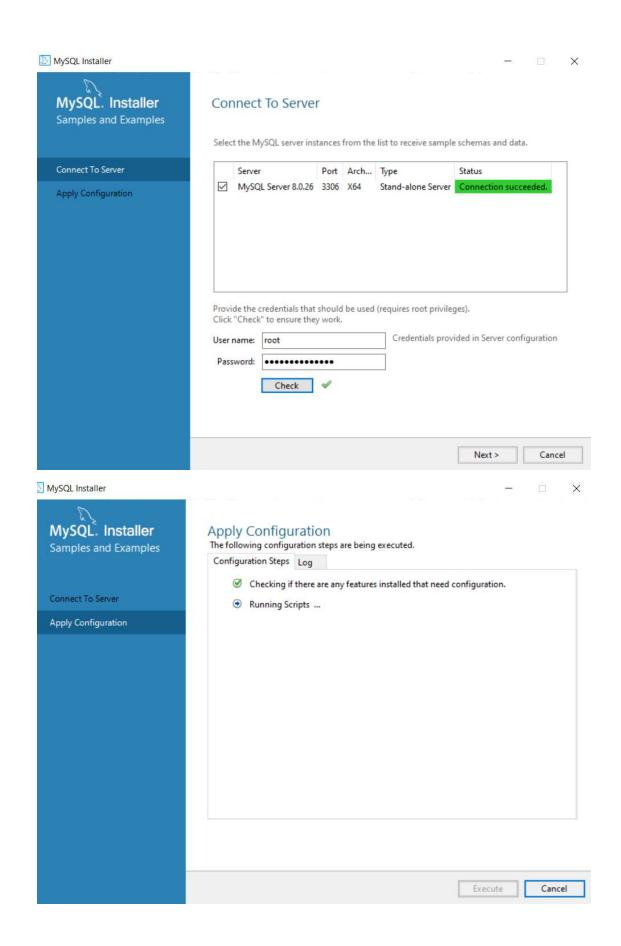

Set a strong password otherwise communication might fail -> Password 123#@!

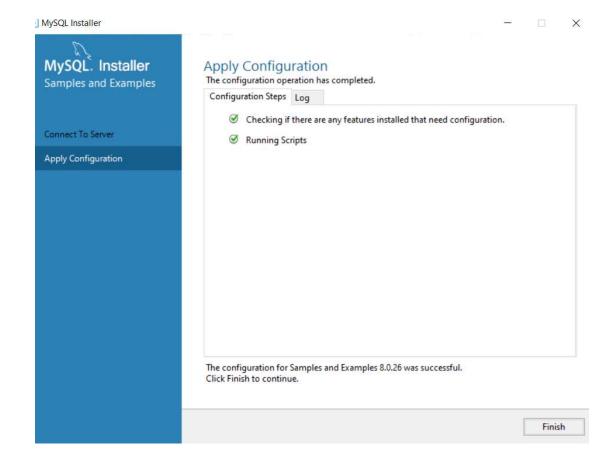

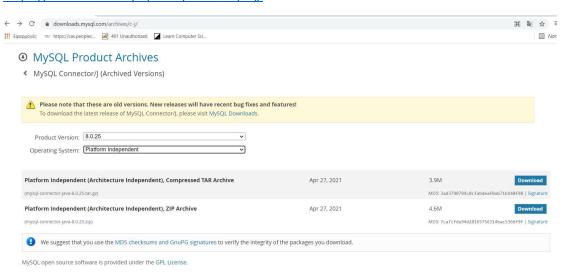

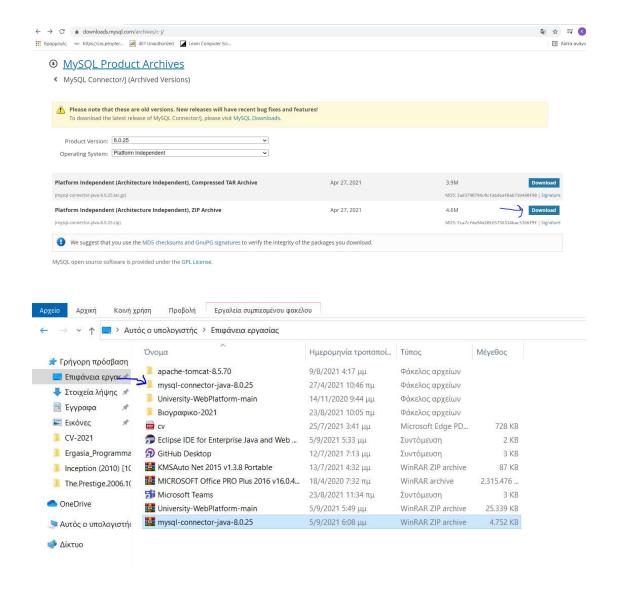

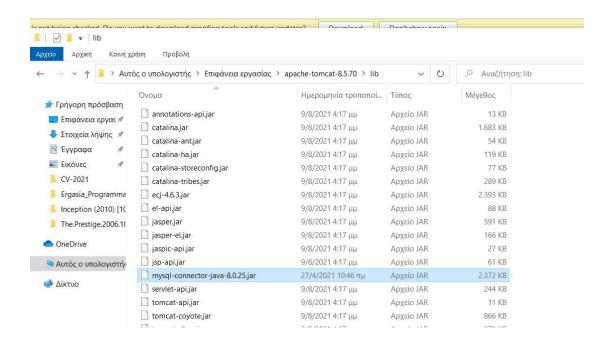

Download Mysql connector.

https://downloads.mysql.com/archives/c-j/

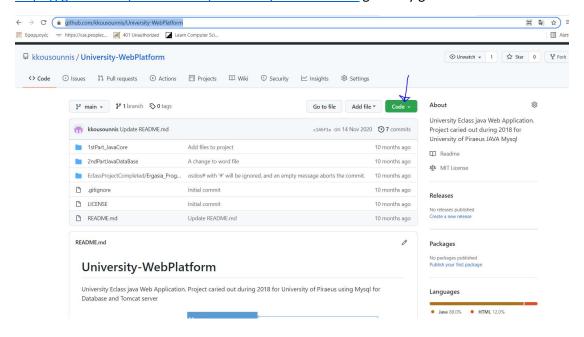

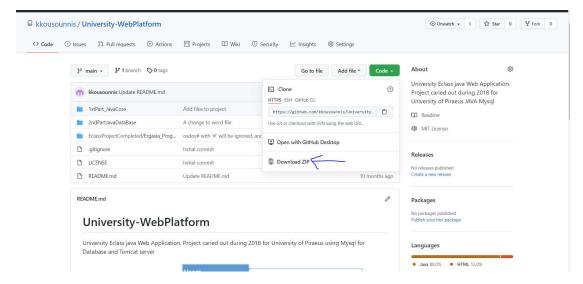

Copy file and paste it under tomcat/lib from the tomcat installation before.

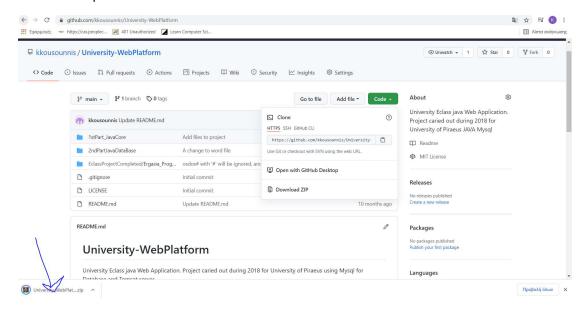

Seting up Project

https://github.com/kkousounnis/University-WebPlatform go to my github account

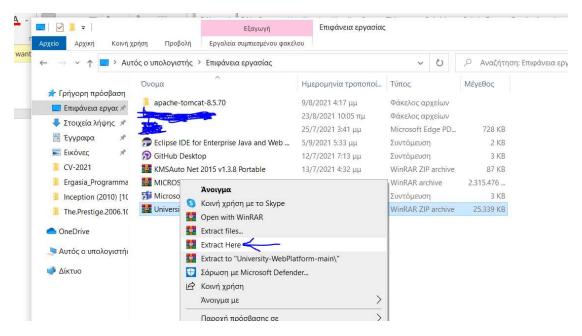

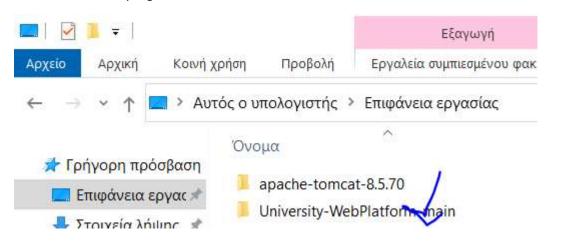

Download Zip

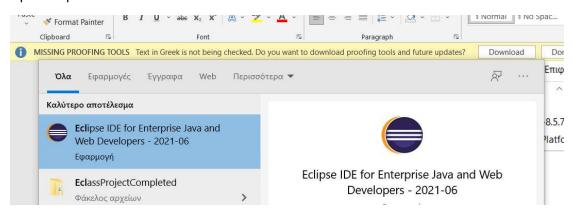

Extract zip file.

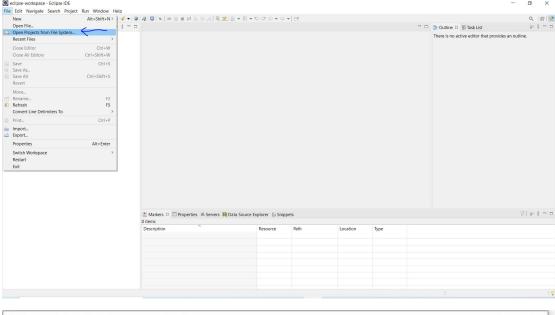

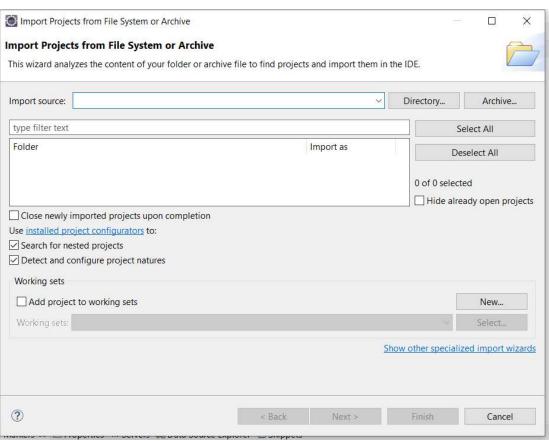

You must have rar program.

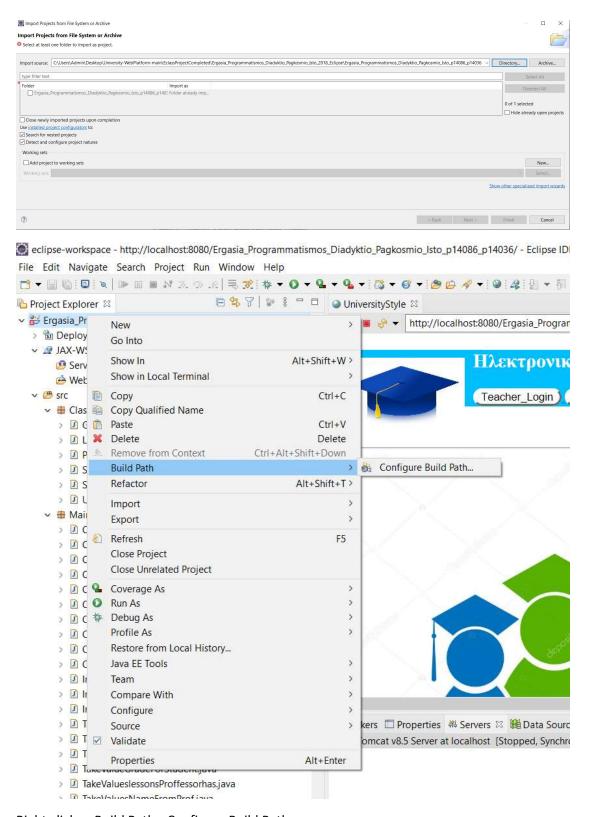

Open Eclipse

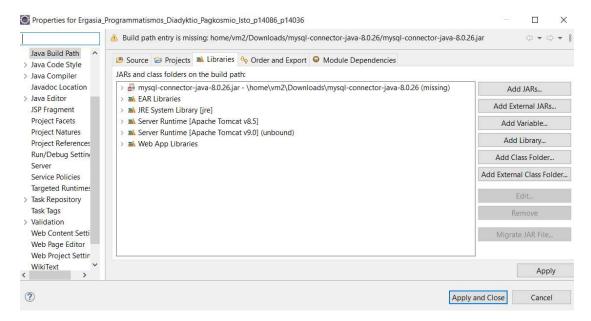

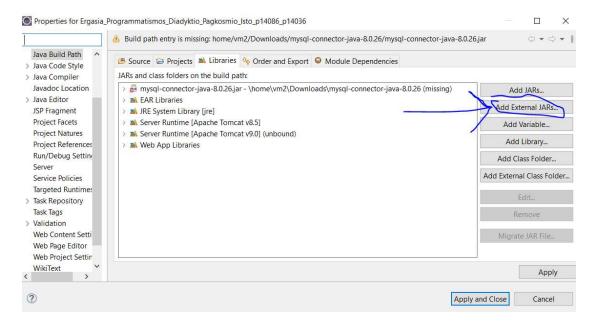

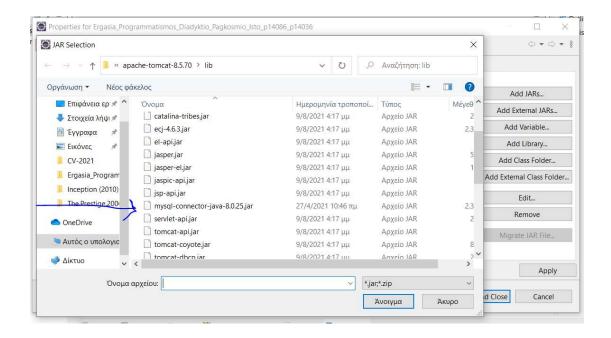

Right click -> Build Path->Configure Build Path

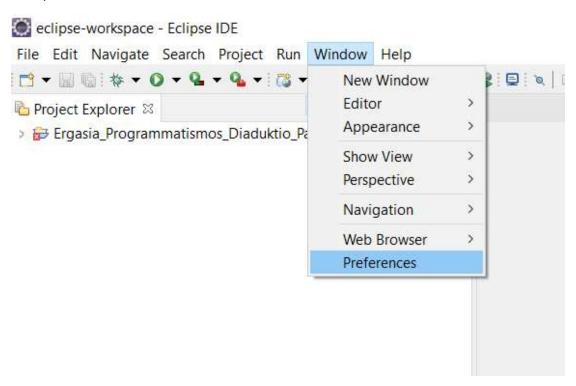

Remove mysql-connector-java-8.0.26.jar since the path is not right.

Add External Jars

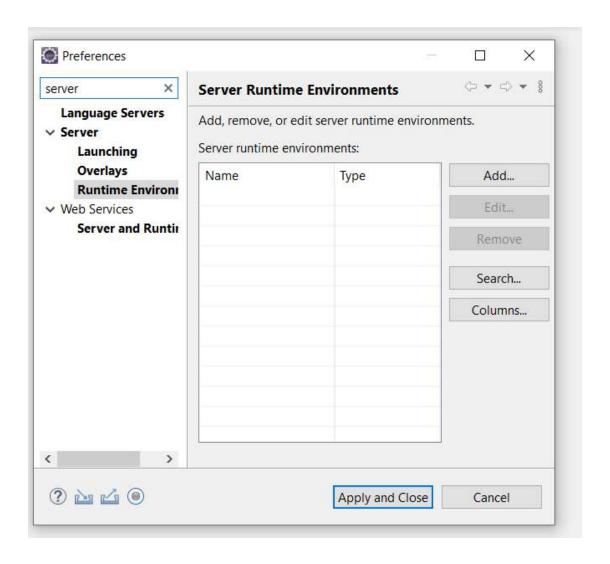

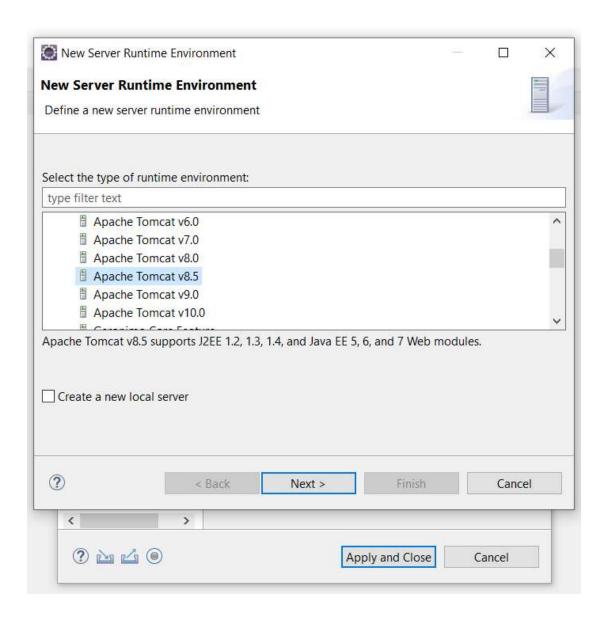

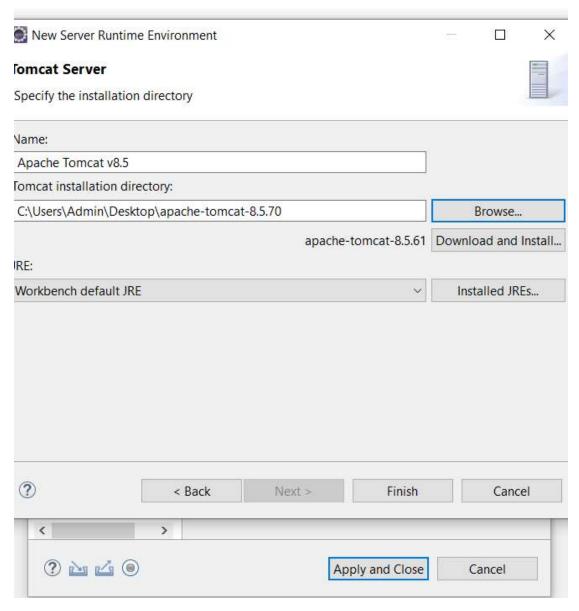

Set Up the Installed tomcat.

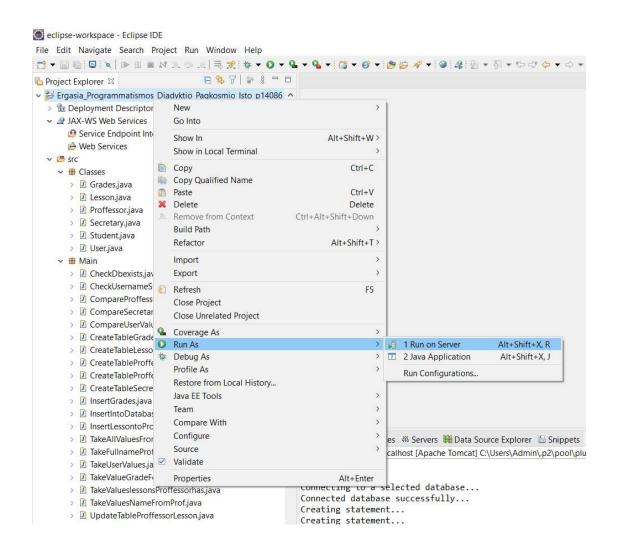

Window->Preferences

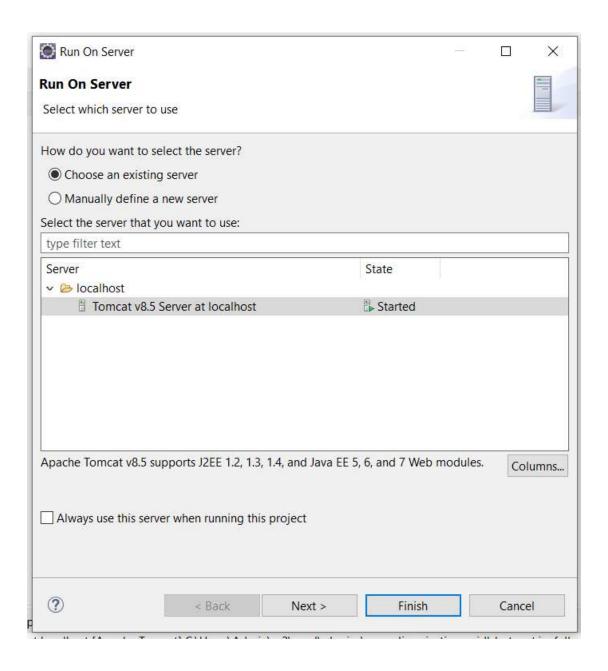

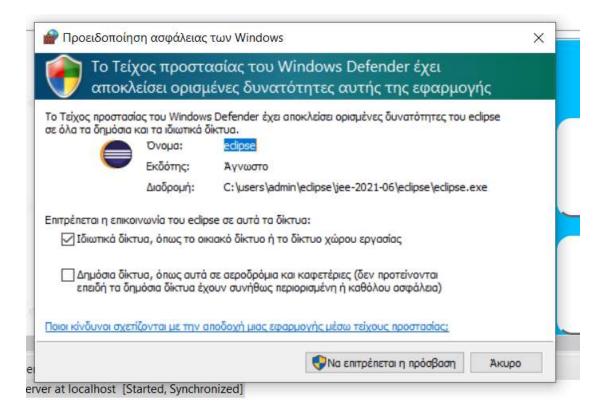

Finish->Apply and Close.

Right click Run As->Run On Server

Allow

In order for the database to work you must set up your own password through the files.
